

KIM BRIAN DE SILVA

Senior Full Stack Engineer | .NET | C# | React | Azure | FinTech

Pampanga, Philippines | desilva.kb02@gmail.com | +63 926 838 9237 | linkedin.com/in/kbdsilva | github.com/kaiserz02

SUMMARY

Full Stack Engineer with 4+ years of experience building, maintaining, and improving production applications across financial services, mobility, and HR platforms. Strong background in C#, .NET, ASP.NET Core, .NET MAUI, Blazor, REST APIs, SQL, Azure, and CI/CD. Currently working as a Full Stack .NET Web and Mobile Application Developer at Equity Tech in Australia, maintaining and upgrading production applications to .NET 10 while improving development pipelines across multiple client projects. Previous experience includes backend development for financial technology platforms within the Philippine Stock Exchange ecosystem, with a focus on APIs, business logic, transactional data, database performance, and application security. Experienced in backend development, system troubleshooting, API and SQL performance optimization, application modernization, and delivering features across web and mobile platforms.

PROFESSIONAL EXPERIENCE

Equity Tech Pty Ltd, Australia

Full Stack .NET Web and Mobile Application Developer | Jul 2025 to Present | .NET MAUI, Blazor, JavaScript, SQL

- Maintain and extend production .NET web and mobile applications, implementing new features and leading the upgrade path to .NET 10.
- Develop and maintain web and mobile functionality using .NET, .NET MAUI, Blazor, and JavaScript with SQL-backed data layers.
- Build features across booking, tracking, customer, and rewards workflows for multiple production applications.
- Build and revamp development pipelines across three client projects: Hughes Luxury Cars, Fit Rewards, and Car Australia.
- Support Hughes Luxury Cars, a national chauffeur and corporate transport booking platform, including functionality related to bookings and operational workflows.
- Contribute to Fit Rewards, an activity-based rewards application supporting user activity and rewards functionality.
- Contribute to Car Australia, a chauffeur transfer platform providing an alternative to traditional taxi services.
- Investigate and resolve application issues across frontend, backend, and database layers.
- Manage sprint planning and task tracking through ClickUp while maintaining version control and code review workflows in Bitbucket.
- Participate in development, testing, code reviews, deployment, and ongoing production support.

Premier Software Enterprise Inc., PSEi Subsidiary

Software Engineer | Jun 2024 to May 2025 | .NET Core 8, C#, ASP.NET Core, Blazor, Vue.js, MySQL

- Contributed to backend development and redevelopment of financial technology platforms supporting the Philippine Stock Exchange ecosystem.
- Worked on the Philippine Dealing System and PSEConnect trading platform, gaining hands-on exposure to systems supporting securities trading and capital markets operations.
- Developed and maintained backend functionality using C# and .NET Core, including REST APIs, business logic, data processing, and database operations.
- Worked with trading-related workflows and transactional financial data where accuracy, reliability, security, and performance were critical.
- Optimized SQL queries and database indexes for trade reporting modules, reducing query execution time by approximately 60% under high transaction loads.
- Developed backend functionality supporting financial applications and integrated application services with MySQL data layers.
- Implemented OAuth 2.0 and JWT authentication across PDS platforms, replacing legacy session handling and addressing outstanding security review findings.
- Investigated backend issues across application, API, and database layers and implemented fixes through root cause analysis.
- Collaborated with developers and stakeholders to translate financial and trading requirements into maintainable backend solutions.

1080 Agile Pty. Ltd

C# .NET Developer | Feb 2022 to Jun 2024 | .NET, Blazor, .NET MAUI, Azure DevOps

- Built and maintained HCMevolve, a workforce management SaaS platform for labour-hire and recruitment agencies.
- Developed functionality covering employee records, job allocation, timesheet processing, and workforce management.
- Delivered the HCMevolve Employee and Client mobile applications for iOS and Android using .NET MAUI.
- Implemented mobile functionality for timesheet entry, shift approvals, and real-time staff tracking.
- Investigated and optimized SQL queries used by workforce reporting, reducing dashboard load times from approximately 8 seconds to under 2 seconds.
- Automated timesheet-to-payroll workflows, removing hours of manual processing per pay run.
- Used Azure DevOps for source control, task management, and CI/CD workflows.

SELECTED PROJECTS

PSEConnect Trading Platform

Philippine Stock Exchange Technology Ecosystem | FinTech | C# | .NET Core 8 | ASP.NET Core | REST APIs | MySQL

- Contributed to the development and enhancement of backend functionality for PSEConnect, an online trading platform within the Philippine Stock Exchange technology ecosystem.
- Worked with backend services supporting trading-related workflows, transactional financial data, and business rules.
- Developed REST APIs and backend components using C# and .NET Core.
- Worked with database operations and SQL optimization for financial and trade reporting functionality.
- Improved trade reporting query performance by approximately 60% through indexing and query rewrites under high transaction loads.
- Implemented OAuth 2.0 and JWT authentication flows to improve application security and replace legacy session handling.
- Troubleshot issues across backend services, APIs, and database layers with a focus on reliability and data accuracy.

- Gained practical exposure to software engineering within a capital markets and securities trading environment.

HCMevolve Workforce Management Platform

1080 Agile Pty. Ltd | .NET | Blazor | .NET MAUI | SQL | Azure DevOps

- Built and maintained features for a workforce management SaaS platform serving labour-hire and recruitment agencies.
- Developed web and mobile functionality covering employee management, job allocation, timesheets, shift approvals, and staff tracking.
- Developed iOS and Android applications using .NET MAUI.
- Optimized workforce reporting queries and reduced dashboard load times from approximately 8 seconds to under 2 seconds.
- Automated timesheet-to-payroll processes to reduce manual processing during payroll runs.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript (ES6+), SQL, Python

Backend: .NET, ASP.NET Core, RESTful APIs, GraphQL, Entity Framework Core, Dapper

Frontend: React, Angular, Blazor, .NET MAUI

Databases: SQL Server, PostgreSQL, MySQL, Query Optimization, Indexing

Cloud and DevOps: Microsoft Azure, Azure DevOps, ClickUp, Bitbucket, CI/CD, Docker, Git

Observability: Grafana, Sentry, OpenLens

Security: OAuth 2.0, JWT, OpenID Connect, ASP.NET Core Identity

Architecture and Practices: Clean Architecture, TDD, Agile, Scrum, Kanban, AI-assisted Development, GitHub Copilot

EDUCATION

Bachelor of Science in Information Technology | Angeles University Foundation, 2021

Specialization in Web and Mobile Development | Academic Scholar, AUF and Tulong Dunong Program

CERTIFICATIONS

- ASP.NET Core Identity and Security
- RESTful Web API Development with .NET
- ASP.NET Core: SOLID and Clean Architecture
- Fundamentals of VueJS and .NET MAUI Mobile App Development
- Azure Machine Learning & MLOps: Beginner to Advance
- ChatGPT & Generative AI: The Complete Guide
- Learn Figma: UI/UX Design Essential Training
- MTA: Python
- Cybersecurity Essentials, Cisco
- MLOps Fundamentals, Azure
- Generative AI and LLM Engineering
