

KIM BRIAN DE SILVA

Senior Full Stack Engineer · .NET | Angular | React | Azure

Pampanga, Philippines · desilva.kb02@gmail.com · +63 926 838 9237 · [linkedin.com/in/kbdsilva](https://www.linkedin.com/in/kbdsilva)

PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 4+ years of enterprise experience building, optimizing, and stabilizing mission-critical applications across financial services, tax, mobility, and HR platforms. Currently a core member of EY GDS's AgilityX team, delivering full-stack features on an EY-wide mobility and tax product using React, TypeScript, .NET, and Azure. Specializes in production incident resolution, API performance optimization, and scalable system design. Adept at translating complex business requirements into reliable, cloud-native solutions within Agile delivery frameworks.

PROFESSIONAL EXPERIENCE

EY GDS (CS) Philippines Inc. | Full Stack Developer – AgilityX Team

Apr 2026 – Present

Mobility & Tax Product | React · TypeScript · .NET · Azure

- Developing and delivering full-stack features on an EY-wide mobility and tax platform serving day-to-day EY users, using React, TypeScript, and .NET on Azure infrastructure.
- Collaborating within a cross-functional Agile team to translate business and compliance requirements into scalable, production-ready solutions.
- Contributing to API design and integration, ensuring clean, maintainable TypeScript/C# codebases aligned with Clean Architecture principles.
- Participating in code reviews, sprint planning, and CI/CD deployments via Azure DevOps, maintaining high release quality and velocity.

EY GDS (CS) Philippines Inc. | Full Stack Developer – Core Client SWAT Team

Jul 2025 – Mar 2026

Enterprise Applications | .NET 6/9 · Angular · React · Blazor · Azure DevOps

- Selected for the elite SWAT Team, resolving high-severity production incidents across 18+ enterprise applications, directly improving system stability and reducing mean time to resolution.
- Engineered and enhanced full-stack systems using .NET 6/9, Angular, React, and Blazor, supporting mission-critical business operations at scale.
- Designed and optimized REST APIs and complex SQL queries, achieving measurable reductions in backend response latency across key services.
- Drove root cause analysis on recurring production failures, implementing preventive fixes that eliminated regression patterns across multiple systems.
- Leveraged Grafana and Sentry to proactively monitor system health, detect anomalies, and address performance degradations before user impact.
- Contributed to CI/CD pipeline improvements in Azure DevOps, streamlining release workflows and reducing manual deployment overhead.
- Facilitated knowledge transfer during incident resolution, elevating team capability and reducing dependency on individual contributors.

Premier Software Enterprise Inc. (PSEi Subsidiary) | Software Engineer

Jun 2024 – May 2025

Financial Platforms | .NET Core 8 · Blazor · Vue.js · MySQL

- Played a pivotal role in modernizing the Philippine Dealing System (PDS), improving platform security, usability, and performance for a regulated financial trading environment.
- Optimized backend services and SQL queries, significantly reducing execution times and improving system responsiveness under high transaction loads.
- Implemented secure authentication flows using OAuth 2.0 and JWT, strengthening application security posture across financial platforms.

- Delivered end-to-end features within Azure DevOps Agile workflows, collaborating with product managers and UX teams to ship scalable, well-designed solutions.

1080 Agile Pty. Ltd | *C# .NET Developer*

Feb 2022 – Jun 2024

HR, Recruitment & Mobile | .NET · Blazor · .NET MAUI · Azure DevOps

- Built and maintained features across multiple .NET applications supporting recruitment, HR, and mobile operations for enterprise clients.
- Led migration of the Hughes Mobile App from legacy Xamarin to .NET MAUI, improving cross-platform performance, maintainability, and long-term supportability.
- Resolved SQL bottlenecks and improved database query performance, enhancing overall system reliability and responsiveness.
- Supported automation of HR and payroll workflows, improving operational efficiency across client organizations.
- Actively contributed to code reviews, sprint ceremonies, and CI/CD workflows, establishing strong Agile delivery habits early in career.

KEY PROJECTS

EY AgilityX – Mobility & Tax Platform *(Apr 2026 – Present)*

- Full-stack feature development on an EY-internal mobility and tax product, used daily by EY employees globally. Stack: React, TypeScript, .NET, Azure — with AI-assisted workflows via GitHub Copilot and ChatGPT to accelerate development, code reviews, and debugging.

Enterprise Syndicate Applications – EY SWAT

- Stabilized and enhanced 18+ enterprise systems across EY’s client portfolio, delivering production fixes, performance improvements, and automation enhancements under SLA pressure.

PDS Websites Revamp – Philippine Dealing System

- Led redevelopment of administrative and public-facing financial platforms for one of the Philippines’ primary securities market operators, improving accessibility, performance, and UX.

PSE EQUIP – Real-Time Equities Platform

- Contributed to a real-time stock data platform with live analytics and portfolio tracking, supporting investor decision-making at scale.

Hughes Mobile App – Xamarin to .NET MAUI Migration

- End-to-end migration of a chauffeur booking, tracking, and in-app payments app from Xamarin to .NET MAUI, improving performance, maintainability, and cross-platform coverage.

TECHNICAL SKILLS

Languages	C#, TypeScript, JavaScript (ES6+), Python, F#
Frontend	React, Angular, Vue.js, Blazor, .NET MAUI
Backend	.NET Core / ASP.NET MVC, RESTful APIs, GraphQL, Microservices (exposure)
Auth & Security	OAuth 2.0, JWT, OpenID Connect, ASP.NET Core Identity
Databases	SQL Server, PostgreSQL, MySQL, MongoDB · Entity Framework Core, Dapper, LINQ · Query Optimization, Indexing
Cloud & DevOps	Microsoft Azure, Azure DevOps (Boards, Repos, Pipelines, Releases), CI/CD, Docker, Git
Observability	Grafana, Sentry, OpenLens
Architecture	Clean Architecture, TDD, Agile (Scrum / Kanban), Performance Optimization, Scalable System Design
AI Dev Tools	GitHub Copilot, ChatGPT, Claude
Tools	Visual Studio, VS Code, Postman, Figma, WinSCP, PuTTY

EDUCATION

Bachelor of Science in Information Technology

Angeles University Foundation

Specialization: Web & Mobile Development · Academic Scholar (AUF & Tulong Dunong Program)

CERTIFICATIONS & TRAINING

- ASP.NET Core Identity & Security
- RESTful Web API Development (.NET)
- Microsoft Technology Associate: Python
- Cybersecurity Essentials – Cisco
- MLOps Fundamentals (Azure)
- Generative AI & LLM Engineering

KEY STRENGTHS

- Production incident management & root cause analysis
- API and SQL performance optimization
- System observability, reliability, and monitoring
- Scalable system design & enterprise architecture support
- Full-stack development across web and mobile platforms
- CI/CD automation and cloud-native delivery
- AI-assisted development workflows (Copilot, Claude, ChatGPT)
